Software Developer - Fullstack

724605BR

Your Role and Responsibilities

As a key member of our dynamic team, you will play a vital role in crafting exceptional software experiences. Your responsibilities will encompass the design and implementation of innovative features, fine-tuning and sustaining existing code for optimal performance, and guaranteeing top-notch quality through rigorous testing and debugging. Collaboration is at the heart of what we do, and you'll be working closely with fellow developers, designers, and product managers to ensure our software aligns seamlessly with user expectations.

The role seeks good levels of personal organisation and the ability to work well within a distributed global team in a fast paced and exciting environment. You will be office based, working with senior software engineers who will help you integrate into the team, the department and wider IBM. You will be joining a development squad following Design Thinking and Agile principles where you are expected to collaboratively develop creative solutions. The work can be varied, flexibility to learn new technologies and skills is key as we look to help grow your career within IBM. A positive attitude and a passion to succeed is essential in joining a high performing software development team at IBM.

Introduction

At IBM, work is more than a job - it's a calling: To build. To design. To code. To consult. To think along with clients and sell. To make markets. To invent. To collaborate. Not just to do something better, but to attempt things you've never thought possible. Are you ready to lead in this new era of technology and solve some of the world's most challenging problems? If so, let's talk.

Required Technical and Professional Expertise

- 1-3 years experience in software development
- 1-3 years of working experience with JAVA/Python/JavaScript, other languages also considered.
- Knowledge with Both SQL and NoSQL Database implementations
- Knowledge with Frontend Technology - React/Angular/Vue anyone

Preferred Technical and Professional Experience

- Exceptional knowledge of data structures, algorithms, enterprise systems, asynchronous architectures, and object-oriented programming
- Experience with popular AWS, Azure and/or GCP services for compute, storage, and databases etc.
- Experience developing Single Page Web Applications and frameworks like React or equivalent.
- Experience developing JS, CSS, HTML sites.
- Professional experience building REST APIs.
- Passionate and driven to design and implement scalable, programmatic solutions to complex problem
- Ability to handle multiple competing priorities in a fast-paced environment
- Technical experience in building and delivering complex software systems
- Experience in working with customers, product management, and senior management to deliver value to the market

Required Education

Bachelor's Degree

Preferred Education

Bachelor's Degree

About Business Unit

IBM Software infuses core business operations with intelligence—from machine learning to generative AI—to help make organizations more responsive, productive, and resilient. IBM Software helps clients put AI into action now to create real value with trust, speed, and confidence across digital labor, IT automation, application modernization, security, and sustainability. Critical to this is the ability to make use of all data, because AI is only as good as the data that fuels it. In most organizations data is spread across multiple clouds, on premises, in private datacenters, and at the edge. IBM's AI and data platform scales and accelerates the impact of AI with trusted data, and provides leading capabilities to train, tune and deploy AI across business. IBM's hybrid cloud platform is one of the most comprehensive and consistent approach to development, security, and operations across hybrid environments—a flexible foundation for leveraging data, wherever it resides, to extend AI deep into a business.

Wonder if IBM is the one for you?

In a world where technology never stands still, we understand that, dedication to our clients success, innovation that matters, and trust and personal responsibility in all our relationships, lives in what we do as IBMers as we strive to be the catalyst that makes the world work better.

Being an IBMer means you'll be able to learn and develop yourself and your career, you'll be encouraged to be courageous and experiment everyday, all whilst having continuous trust and support in an environment where everyone can thrive whatever their personal or professional background.

Our IBMers are growth minded, always staying curious, open to feedback and learning new information and skills to constantly transform themselves and our company. They are trusted to provide on-going feedback to help other IBMers grow, as well as collaborate with colleagues keeping in mind a team focused approach to include different perspectives to drive exceptional outcomes for our customers. The courage our IBMers have to make critical decisions everyday is essential to IBM becoming the catalyst for progress, always embracing challenges with resources they have to hand, a can-do attitude and always striving for an outcome focused approach within everything that they do.

Are you ready to be an IBMer?

About IBM

IBM's greatest invention is the IBMer. We believe that through the application of intelligence, reason and science, we can improve business, society and the human condition, bringing the power of an open hybrid cloud and AI strategy to life for our clients and partners around the world.

Restlessly reinventing since 1911, we are not only one of the largest corporate organizations in the world, we're also one of the biggest technology and consulting employers, with many of the Fortune 50 companies relying on the IBM Cloud to run their business.

At IBM, we pride ourselves on being an early adopter of artificial intelligence, quantum computing and blockchain. Now it's time for you to join us on our journey to being a responsible technology innovator and a force for good in the world.
